<b>Title:</b> AXLE AND DIFFERENTIAL: DIFFERENTIAL SYSTEM: PRECAUTION (2010 4Runner)		

## **PRECAUTION**

### **1. IGNITION SWITCH EXPRESSION**

#### **HINT:**

**The type of ignition switch used on this model differs according to the specifications of the vehicle. The expressions listed in the table below are used in this section.**

EXPRESSION	IGNITION SWITCH (POSITION)	ENGINE SWITCH (CONDITION)
Ignition Switch off	Off	Off
Ignition Switch ON	ON	On (IG)
Ignition Switch ACC	ACC	On (ACC)
Engine Start	START	Start

### **2. PRECAUTION**

- (a) Before disassembly, clean the outside of the differential assembly and remove any sand or mud to prevent it from entering the assembly during disassembly and installation.
- (b) When removing connected parts made of a light alloy, such as differential carrier covers, tap them off with a plastic-faced hammer. Do not attempt to pry them off with a screwdriver.
- (c) Always arrange disassembled parts in order and protect them from dust.
- (d) Before installation, thoroughly clean and dry each part, and then apply hypoid gear oil to it. Do not use alkaline cleaner for aluminum or rubber parts, or ring gear set bolts. Also, do not clean rubber parts such as O-rings or oil seals with non-residue solvent.
- (e) Coat all sliding surfaces and rotating parts with hypoid gear oil.
- (f) When holding a part with a vise, be sure to place an aluminum sheet between the part and vise. Do not put the part directly in the vise.
- (g) Be careful not to damage the contact surfaces of the case. Such damage could cause oil leakage.
- (h) Before applying new sealant, remove any old sealant and clean the part to be sealed using non-residue solvent.
- (i) Do not add differential oil immediately after installing sealed parts. Leave them for at least an hour.
- (j) Damage to the surfaces in direct contact with oil seals, O-rings or gaskets could cause oil leakage.
- (k) When press-fitting an oil seal, be careful not to damage the lip of the oil seal and outside periphery.
- (l) When replacing a bearing, replace the inner and outer races as a set.
- (m) Be careful not to damage or deform aluminum parts when clamping them in a vise.
